

**A SYSTEM FOR DELAYED VIEWING OF SELECTED DOCUMENTS  
HYPERLINKED TO HYPERTEXT DOCUMENTS RECEIVED AT A  
USER INTERACTIVE RECEIVING DISPLAY STATION IN A  
COMPUTER CONTROLLED COMMUNICATION NETWORK**

5

Abstract

An implementation whereby a user may note a  
hyperlink in a Web document or E-Mail may be of possible  
interest and avoid the possible waste of time by just  
saving the hyperlink, rather than accessing and reviewing  
10 the linked document. A user is enabled to designate a  
plurality of hyperlinks in received Web documents for  
subsequent viewing; the designated hyperlinks are stored  
whereby the user may subsequently select the stored  
hyperlinks to thereby access and display their respective  
15 linked documents.
